FABBRICAZIONI MEDICALI

ITALY

We have been manufacturing disposable devices for the medical industry for more than 40 years. Our always evolving structure, allows us to promptly react to the increasing market requirements. Our customers trust us as a reliable partner to establish long lasting cooperation. On time delivery and service are our standard.

100%

CUSTOM

COMPANY

Historically linked to the haemodialysis field, in the last years has dedicated its experience to other fields like, for example, chemotherapy. It is a dynamic and flexible company, which is willing to catch inputs from the market. Its proficiency, attention and service to the customer has allowed it to grow and to develop on the national and international market, throughout qualified partnerships.

RESEARCH AND SELECTION

QUALITY

EffeEmme has always offered to its partners products of high quality, through research and careful selection of components and raw materials, entrusting only certified suppliers.
All production phases are checked to guarantee always satisfactory results. The leakage test is guaranteed on 100% of production.

ENVIRONMENT

Being conscious of the environment, the company is committed to reduce the environmental impact in every phase of the production cycle.
From the selection of raw materials, to the recycling or to the waste disposal, EffeEmme prefers ecological solutions.
Thanks to its own photovoltaic system it produces yearly 200.000 Kw of clean energy and thanks to recycling it saves yearly tons of carbon dioxide equal to the electric power consumption of 6 private households.

DIALYSIS

diaLine®

We produce arterial and venous lines and accessories for dialysis treatments available in both standard version (ready for prompt collection) and customized ones. Our sets are compatible with every machine present on the market (Fresenius, Nikkiso, Braun, Baxter/Gambro, Bellco, Toray).

MATERIALS

↓

In accordance with the new regulation 2007/47/EC, tubing and components used in the production of our lines are DEHP-free and grant high standard of biocompatibility.

STERILIZATION → By radiation or ETO upon request.

TECHNICAL DOCUMENTATION → Upon request, we support our customers with technical data sheets for all our products.

ACCESSORIES → Wide range of accessories like: connecting lines, extensions, infusion lines and Y connectors.

SPECIAL PRODUCTS → Production of lines for haemofiltration, haemodiafiltration and continuous treatments.

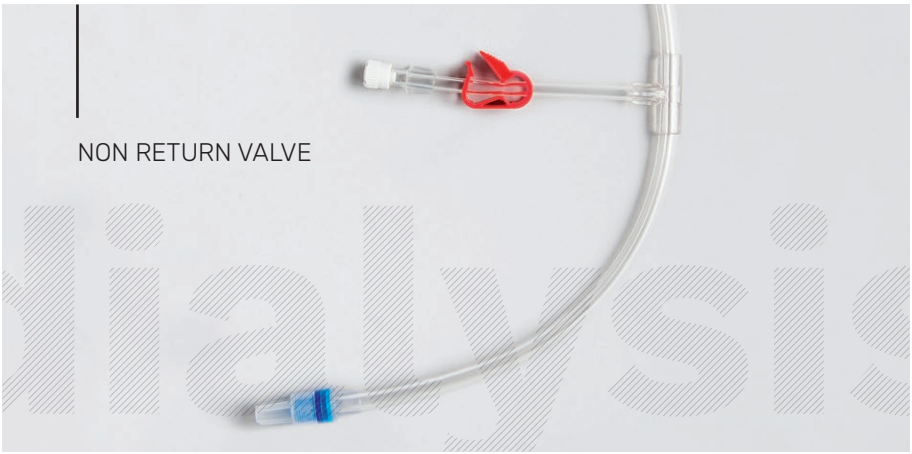

COMPONENTS

↓

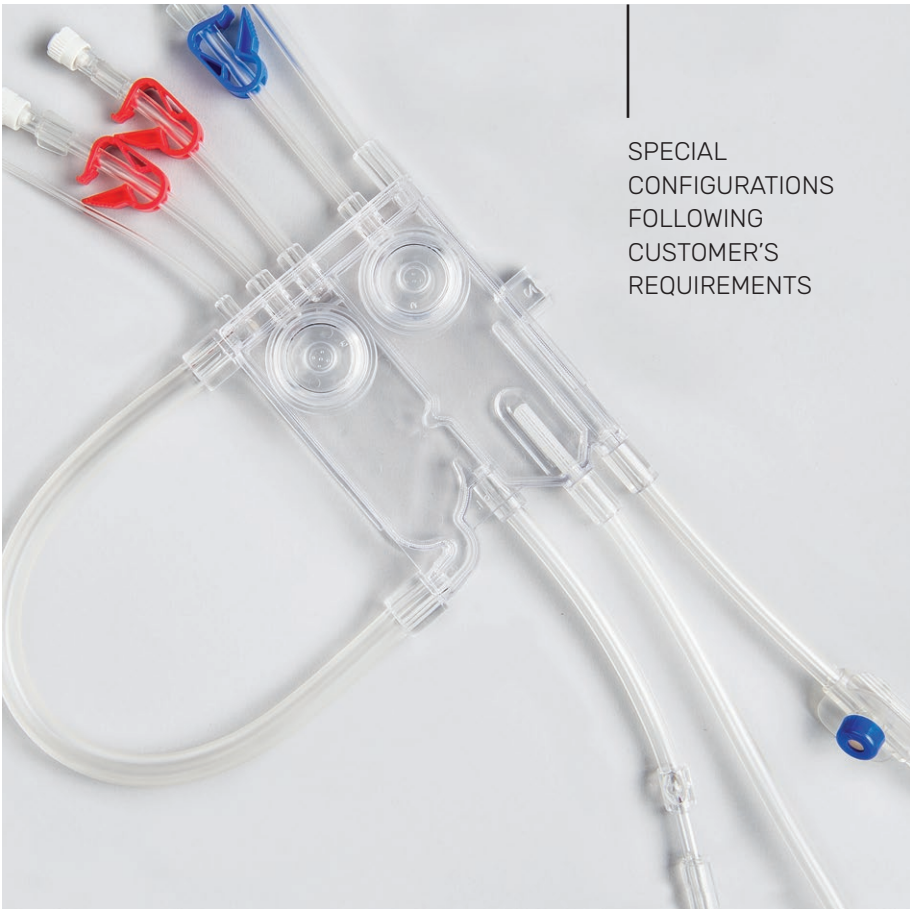

Critical components are produced internally: blown or moulded chambers, anti-clotting filters and tubing.

We cooperate with equipment manufacturers to jointly deliver results in line with the highest standards in terms of **quality, safety, performance and comfort**.
